

67th IACIS Annual Conference

Wednesday, October 6 – Sunday, October 10, 2027

Sheraton Sand Key Resort
1160 Gulf Blvd.
Clearwater Beach, Florida 33767

Conference Theme:

Reimagining the Digital Ecosystem: Transforming Information Systems Teaching, Learning, and Research in the Age of AI

As artificial intelligence transitions from exploratory adoption to an integral component of the digital ecosystem, the IACIS 2027 conference invites educators, researchers, and practitioners to explore the transformation of information systems teaching, learning, research, and practice. Grounded in frontier developments like agentic systems and multimodal reasoning, the conference focuses on leveraging adaptive technologies to personalize instruction, accelerate discovery, and transform organizations without sacrificing critical thinking. Attendees will examine dynamic curricula, assessment, interdisciplinary collaboration, and responsible AI governance across key areas, including analytics, cybersecurity, systems development, and digital platforms, to shape an increasingly intelligent ecosystem that fosters innovation, discovery, and meaningful human advancement.

More information will be available on the IACIS Conference page soon.
